PERSONAL DETAILS

Current Location	Rewari, Haryana
Date of birth	October 9, 2006
Gender	Male

EDUCATION

Graduation	BCA (Computers) SGT University, Gurgaon Achievements: Project Builder
Class XII	CBSE with 74% in 2025
Class X	CBSE with 69% in 2023
Certification Course	Generative AI Mastery Workshop

INTERNSHIPS AND PROJECTS

Projects	AI PDF Genius (Duration November 2025 - December 2025) AI PDF Genius is a free-first, premium-grade PDF intelligence platform that lets users upload, edit, summarize, and interact with PDFs directly in the browser. The tool performs all core tasks client-side (PDF preview, merge, split, rotate, text extraction, OCR with Tesseract.js) to ensure speed, privacy, and trust. Premium features—such as abstractive summaries, Chat-with-PDF, MCQ generation, resume optimization, and contract risk analysis—are powered by Groq's ultra-fast LLMs through a secure backend proxy. The platform is built using React, Tailwind, PDF.js, Node.js, and a local/remote LLM toggle architecture for seamless development and production deployment. Skills used - React.js,Nextjs,Tailwind CSS,Node.js,Javascript,Large Language Model,API,Ui/Ux,Hotel Management
	AI Career Accelerator (Duration October 2025 - November 2025) Developed an AI-powered platform designed to help students and professionals accelerate their career growth by generating personalized career roadmaps, job-ready skill paths, resume optimization tips, and learning plans. The tool analyzes user inputs and uses AI recommendations to deliver actionable steps, resource suggestions, and progress guidance. Built with a clean and responsive UI, the platform is deployed on Vercel and offers a smooth, fast user experience. This project demonstrates practical experience with real-world AI integration, user input processing, and building tools that provide high-value career support. Skills used - React.js,Nextjs,Web Hosting,Hosting,UI UX Development,Ui/Ux,Large Language Model,Tailwind CSS,API,Prompt Engineering
	Age Calculator Web App (Duration August 2025 - August 2025) Developed a simple and user-friendly Age Calculator web application that allows users to enter their date of birth and instantly calculate their exact age in years, months, and days. The tool provides accurate results in real-time and is designed with a clean and responsive UI for a smooth user experience. The project focuses on understanding date manipulation, form handling, and implementing real-time calculations, making it a useful beginner-friendly utility project. Skills used - HTML,CSS,Javascript,Frontend Development,Web Hosting,Managed Hosting,Project Management
	AI Content Authenticity Verifier (Duration August 2025 - September 2025) Built an AI-powered web application that detects whether a given text is AI-generated or human-written with high accuracy. The tool uses advanced NLP models and probability scoring to analyze writing patterns, structure, and linguistic features. The platform is deployed on Vercel and features a clean, responsive UI for a seamless user experience. This project demonstrates hands-on experience in AI integration, API usage, frontend development, and building a real-world SaaS-style tool that solves an increasing problem in digital content verification. Skills used - Nextjs,React.js,Hotel Management,API,CSS,Prompt Engineering,API Testing,Ui/Ux,Prompt Personnel
